PROFESSIONAL SUMMARY

Builder with strong visual taste working across design, AI, and engineering. Designs products, builds systems, and creates workflows that help teams ship thoughtful, well-crafted experiences.

SKILLS

Core Skills: Systems Thinking, Design Systems, Agentic Systems, Code-Based Prototyping, AI-Assisted Development, Product Design, User Experience (UX) for Technical Products

Design Tools: Figma, Subframe, Contentful Content Management System (CMS)

Agentic Engineering: Agent Threads, Context Engineering, Model Context Protocol (MCP)

Coding Agents & AI Tools: Claude Code, Pi, Cursor

WORK EXPERIENCE

Product Designer, Systems Team, Red Ventures

08/2024 - Present

Charlotte, NC

- Developing core agentic design system infrastructure using structured component metadata and codebase context graphs to enable AI assisted auditing, drift detection, and self-healing recommendations across the design system.
- Accelerated landing page creation in Contentful Content Management System (CMS) by developing Claude Code multi-agent workflows and context scaffolding, reducing build time by approximately 70 percent.
- Partnered with engineering to design and ship Flex, a modular Contentful content type that enabled flexible multi-column layouts through a slot-based architecture, reusable field configurations, and component guardrails, resulting in 283 Flex entries powering content across 100 plus pages and driving a 44 percent increase in session-to-registration.

Design Intern, Nave Bank

06/2023 - 07/2023

San Juan, Puerto Rico

- Led visual design and high-fidelity iteration of the Nave Bank card from initial sketches to final designs.
- Refined the Nave Bank customer portal design system and its component libraries in Figma, prioritizing the most frequently used components, resulting in increased ease of use and improved design consistency.

PROJECTS

Rondo, Designer and Engineer

05/2026 - Present

- Designed and built Rondo, a personalized AI infrastructure layered on top of Claude Code, inspired by Daniel Miessler's Personal AI (PAI) framework.

EDUCATION

Bachelor of Arts, Computational Psychology, Colby College

05/2020 - 05/2024

Waterville, ME

INTERESTS

Agentic design and engineering, DJing and vinyl collecting, Wake surfing, Architecture
